INDOOR
VIDEOBOARDS

SHOT CLOCKS

When integrated with Watchfire's Ignite Sports software, the ReadyDisplay™ Shot Clock becomes an independent videoboard. Add regions for a game clock or display the school mascot, sponsorship ads or fan prompts when not in game use.

The shot clock measures 22" x 22" and includes a protective shield to absorb impact.

Resolutions: 2.4mm, 2.9mm, 3.9mm or 5.9mm

Durable construction

99:59 game clock and :99 shot clock with 1/10 second option

Perimeter light strip indicator

LOCKER ROOM CLOCKS

ReadyDisplay Locker Room Clocks use the same versatile technology as Watchfire's shot clock. It synchronizes with the scoreboard clock, but can also become a videoboard when integrated with Ignite Sports. Use zones to add information like time of day, lineups, motivational quotes, and welcoming messages for prospective players.
