

FOOTBALL

SCORING & ENTERTAINMENT SYSTEMS

Fire up athletes, fans, and sponsors with a scoring and entertainment system from Watchfire. Engineered for all-weather, Watchfire videoboards have rapid refresh rates, high-contrast LEDs, wide-angle viewing, and control room integration. From player photos to sponsor ads and from touchdown animations to the winning score, our displays celebrate the wins and create memorable experiences.

BEST LOOKING VIDEOBOARDS

Make sure your display is a showstopper for years. Watchfire is the only LED manufacturer in the world that calibrates the entire display for color and brightness before it even leaves the factory. We also use true-pixel technology to eliminate red tints and fuzzy video.

CUSTOM BUILT

Watchfire is an LED display manufacturer. We will engineer and build your football scoreboard from the circuit board up. Combined with our more than 90 years of experience, it's no surprise that Watchfire has over 65,000 active displays in operation.

SOUND & VIDEO SYSTEMS

Watchfire offers control room and audio packages to elevate the fan experience. Our **Ignite Sports** gametime software makes it easy to add animations and ad zones to any display. Add the **Action Package** for instant replay, streaming, and live video production. Plus, the **Watchfire Sound™** systems provide ultra-clear audio.

UNLEASH THE TEAM SPIRIT

A good-looking scoreboard grabs attention, but a team-branded scoreboard grabs hearts and loyalty. Our award-winning creative services team will turn your logo and colors into a design and truss that reflects the commitment and pride of your players, fans, and community.

BRANDING

Color is at the core of every sports brand. That's why we hand-selected 30 colors guaranteed to make an impression. Mix and match cabinet colors to create a dynamic two-tone look, and add colorful captions and trim.

A truss showcases your mascot, logo, or name. Our custom-built trusses use patterns, colors, and lighting effects to create a scoreboard that will have all the fans talking. A truss can also create a cohesive look by integrating static panels and audio speakers.

10' x 36' Scoreboard with decorative truss, team graphics and custom white digits | Model: WF-FB-11236

ACCURACY & RELIABILITY

- Precision timing with hand-held devices
- Pinpoint synchronization with clocks
